/home/sakthees-monk/Downloads/android-studio-2025.1.1.13-linux.tar.gz unzip usr/local giveterminal prompt and install

To install Android Studio from the `.tar.gz` file you downloaded (`android-studio-2025.1.1.13-linux.tar.gz`) to `/usr/local`, follow these terminal commands:

Step-by-step Terminal Commands

```
# 1. Go to your Downloads folder
cd ~/Downloads

# 2. Extract the tar.gz file to /usr/local (requires sudo)
sudo tar -xzvf android-studio-2025.1.1.13-linux.tar.gz -C /usr/local/

# 3. Go to the Android Studio bin directory
cd /usr/local/android-studio/bin

# 4. Run the Android Studio setup
./studio.sh
```

Optional: Add to PATH permanently

To make it easier to launch Android Studio from the terminal using just `studio.sh`, you can add it to your PATH:

```
echo 'export PATH=$PATH:/usr/local/android-studio/bin' >> ~/.bashrc
source ~/.bashrc
```

If you're using `zsh` instead of `bash`, replace `~/.bashrc` with `~/.zshrc`.

sakthees-monk@saktheesmonk-desktop:/usr/local/android-studio/bin$ ./studio.sh
